Trusts & Estates News

This week's Trust and Estate article is:
"Post-Election Estate Tax Planning Requires A Cautious Approach"

(Excerpt from actual article):
Like many people, you may have put off finalizing estate tax planning 2024 election results were in. Some people held off on any gifting to make a final decision. Others set up trusts and gifted smaller amounts to them as a placeholder. Now that the White House and both houses of Congress are in Republican control, what comes next?

Is there a better way to prepare your valuations?

Why don't you consider us for your stock and bond valuations for trusts & estates?
Maybe there is a better way than how you are doing them now?

We've been providing these valuations since 1985 and have experience and insight. Our pricing universe contains millions of US and foreign securities with corresponding decades of history. We can speak with you to potentially identify ways to improve accuracy, productivity, and output.

1. Secure online solutions (You do the work to save money.):

- **APPRAISE.API:** a secure interface that streamlines portfolio pricing. This is done by allowing clients to program directly from their trust system into our proprietary pricing system and customize it for their reporting needs. No personal or client data is exchanged. This can be a way to cut costs, improve efficiency, and improve your processing metrics.
- **APPRAISE.Web:** A web-based application, accessed through any browser, that provides stock and bond valuations for estate, gift, and trust tax. Portfolios are saved to your account and accessible wherever you are, on any device.
- **APPRAISE.Software:** Our proprietary software that has been serving our clients since 1985. Install it on any computer and get the estate, gift, and trust tax valuations you need quickly, accurately, and securely.
- **APPRAISE.SaaS:** Software as a Service (SaaS) means we host the software, which you access via the internet, and you store your data locally on your computer. This benefits you and your information technology group because a hybrid solution takes the best of software and web and combines them. You're always running the current version and do not need to install updates. Your portfolio data is stored securely on your computers. It's easy to add and remove users. The underlying technology is Citrix.
- **ESI-Direct:** Thomson Reuters ONESOURCE Trust & Estate securities valuations without valuation software. Everything is done from within the Accounting or 706, reducing steps, saving time, and increasing accuracy.

2. Outsourcing solution (We do the work and save you time.):

- Valuations can be submitted/delivered via email, fax, overnight courier, or mail. Click [HERE](#) for an order form.
